

For Fast & Safe Evacuations

Safe...

The AlbacMat has been designed with safety, for both the rescuer and patient, being of paramount importance

Effective ...

The ability of the AlbacMat to travel easily over most surfaces including stairs, carpet & concrete – allows for improved efficiency when evacuating a facility

Single person operation...

Evacuations can be performed by one person per client in most situations which is essential when time is critical

Use in any location...

The AlbacMat is totally independant of its environment. Designed for use in confined spaces, e.g. bathrooms or corridors, immobile clients can be easily moved to safety

Ready for instant use...

Its compact, self storage and lightweight design means it can be readily available in varying locations for instant use

Design

- Tapered for patient comfort
- Easily accessible dual velcro straps for securing the patient
- Fluorescent yellow straps for detection in dim lighting
- Foot rest pocket for the comfort and security of the patient
- Simple instructions are clearly visible on the self storage pocket
- Separate handles for individual rescuer's requirements
- Conflute board provides patient protection from irregular surfaces and friction
- Patient can remain on the AlbacMat until the danger has passed and still be treated if required
- Handles provide excellent control on staircases
- Compact design makes storage easy
